## Ideation Phase Literature Survey

	, , , , , , , , , , , , , , , , , , ,	
Date	05 November 2022	
Team ID	PNT2022TMID25683	
Project Name Project - Signs with Smart Connectivity for Better Road Safety		
Maximum Marks	4 Marks	

S.N0	Author	Pa er Title	Journal & Year	Remarks / Critics
Ι.	Ashish Dhar	Traffic and road condition monitoring system	Indian Institute of Technology, Mumbai 2008.	Reports severity, intensity and dimension of a damaged road segment.  Proposed a different solution using
		system		AMR Magnetic Sensor.
2.	Pooja Pawar, Suvarna Langade, Mohini Bandgar	IOT Based digital Notice Board using Arduino ATMega 328.		Circulates notice regularly & reduce physical efforts. Send message at any distant location within a second.
3.	Sandeep Chaware, Trushitha Chaware.	Proposed Algorithm for Smart Traffic Control using Ultrasonic Sensor.	International Journal of Engineering and Advanced Technology(1JEAT) 2019.	The outcome of the project is to learn insights of the traffic controlling and management at the signal with the dynamically changing in timing of timer as er need.
4.	Kamna Singh, Deepa Bura	IOT: distinct algorithms for the Sensor Connectivity with Comparative Study between node MCU and Arduino MCU.	NVEO Journal 2021	Presents different algorithms for the connection between different types of sensors. Brief description of node MCU & Arduino MCU.  Step by step solution to provide connectivity with IOT technology.
5.	Jack Greenhaigh	Recognizing Text Based Traffic Signs.	IEEE 2015	Detect all possible Road sign candidates.  Reduce total regions based on contextual constraints.

6.	Bhumika.R, Harshita. S.A, Meena. D, Asha. N	Accident Prevention and Road Safety in Hilly Region using IOT Module	International Research Journal of Engineering and Technology(1RJET)2021	recognition of text in traffic sign based on MSER & MSV.  Stay away from mishap & forestall clog in sloping region & hairclip twist.  As a significant part of street mathematical plan bended street portion
7.	Sowparnika. B	10T Road safety		This project paves a system to alert the driver about the speed limit in specific areas and to reduce the speed of vehicles in sensitive public zones without any interference of drivers where controls are taken automatically by use of wireless local area network.
8.	S.S. Sugania, D. s. Vishalis Hwaran, J. Vignesh Kumar.	Automated System for Road Safety Enhancement using big data reports.		The speed is controlled accordingly to situations to give suggestions.  • The suggested system can control the vehicle but at same time can collect data and manipulate it using the bigdata technologies.
9.		IOT Based Smart Road Safety & Vehicle Accident prevent System for Mountain roads.		This system is divided into 2 half (Accident Detection & Prevention) and alerting the members of family by causation message and placement of accidental lace.

A Novel System for the automatic detection and

12. Chai K. Toll, Juan-Carlos Cano, Carlos Fernandez- Laguia, Pietro Manzoni, Carlos T. Calafate.  The Instituition of Engineering and Technology(1ET)  In this architecture notify the sign can be narrated via voice to driver, in addition to displaying on the dashboard. Changing a sign is easy as reprogramming it with advanced electronics and radio hardware embedded into poles, will be present to transmit programmed traffic signs wirelessly on			·		
Sangeetha Thirumoorthy.  Based Notifications using Smart Notice Board.  Based Notifications of Technology. 2018  of Technology. 2018  field of wireless communication we can make communication more effective, fast and very easy handling method.  With the help of this, displaying of notices can be updated by every second from anywhere and anytime through a mobile hone.  12. Chai K. Toll, Juan-Carlos Cano, Carlos Fernandez- Laguia, Pietro Manzoni, Carlos T. Calafate.  The Instituition of Engineering and Technology(1ET)  The Instituition of Engineering and Technology(1ET)  Chaiging a sign is easy as reprogramming it with advanced electronics and radio hardware embedded into poles, will be present to transmit programmed traffic signs wirelessly on	10.	Pooja Awhale, Shreya Kukdeja, Prashant	identify Traffic Sign Symbols in Color		more reliable and robust method of Traffic Sign Detection Recognition
Sangeetha Thirumoorthy.  Based Notifications using Smart Notice Board.  Based Notifications of Technology. 2018  of Technology. 2018  field of wireless communication we can make communication more effective, fast and very easy handling method.  With the help of this, displaying of notices can be updated by every second from anywhere and anytime through a mobile hone.  12. Chai K. Toll, Juan-Carlos Cano, Carlos Fernandez- Laguia, Pietro Manzoni, Carlos T. Calafate.  The Instituition of Engineering and Technology(1ET)  The Instituition of Engineering and Technology(1ET)  Chaiging a sign is easy as reprogramming it with advanced electronics and radio hardware embedded into poles, will be present to transmit programmed traffic signs wirelessly on					
Juan-Carlos Cano, Carlos Fernandez- Laguia, Pietro Manzoni, Carlos T. Calafate.  Signs of the future.  Engineering and Technology(1ET)  Engineering and Technology(1ET)  the sign can be narrated via voice to driver, in addition to displaying on the dashboard. Changing a sign is easy as reprogramming it with advanced electronics and radio hardware embedded into poles, will be present to transmit programmed traffic signs wirelessly on	11.	Sangeetha	Based Notifications using Smart Notice		field of wireless communication we can make communication more effective, fast and very easy handling method.  With the help of this, displaying of notices can be updated by every second from anywhere and anytime through a mobile
	12.	Juan-Carlos Cano, Carlos Fernandez- Laguia, Pietro Manzoni, Carlos T.		Engineering and	the sign can be narrated via voice to driver, in addition to displaying on the dashboard.  Changing a sign is easy as
